Germany.

*Dear All,*

Without doubt, I feel most fortunate to have been able to attend your clinic to receive treatment for my condition and even more fortunate to have enjoyed a positive outcome.

The professionalism shown was excellent which was coupled with great kindness and consideration by all those I met and, if I may, would wish to express my particular thanks to Mariya for all she did to help with the arrangements both before and during my visit.

I now feel much more optimistic about my future as a result of both the treatment given and the wise counselling offered to me and if I have a wish it is that the work of SAVIR be extended across the world as I feel sure it would help countless more people with vision difficulties.

To conclude, please accept my sincere thanks for all you did for me during the past two weeks and I feel sure I will do all I can to revisit you in due course.

*Yours very sincerely,*  
*Alan Jolley*
